Frontend Developer with 3+ years of experience building modern, scalable, and high-performance web applications. Specialized in React, Next.js, TypeScript, and PrimeReact, with backend integration experience using Node.js, Express, Python Lambdas, and MongoDB.

Strong ability to guide teams and support technical coordination, consistently contributing to efficient delivery. Recognized for solving complex problems, optimizing processes, and collaborating effectively with cross-functional teams and business stakeholders.

Experience

Grupo Salinas / Purpose Financial

Mexico City, MX

Frontend Specialist

November 2024 – Present

- Led the development of the frontend for Purpose Financial's document-management platform using React, TypeScript, and PrimeReact, including integration with peripherals and additional modules.
- Worked on banking applications, delivering secure, scalable interfaces aligned with financial-industry standards.
- Built an internal component library, enabling faster integration across teams and ensuring consistent UI/UX across projects.
- Achieved significant performance improvements by optimizing load times, internal processes, and communication with backend services.
- Contributed to frontend architectural decisions focused on scalability, maintainability, and best practices.

Necus

Mexico City, MX

Frontend Developer

Abril 2024 – Noviembre 2024

- Resolved critical issues, improving platform stability and overall performance.
- Implemented enhancements in accessibility, usability, and user experience.
- Developed new features using React, TypeScript, and MongoDB.
- Collaborated with QA, design, and product teams to improve full end-to-end workflows.

Other Experience (2023–2024)

- **Freelancer:** Developed an Android medical-reporting application and a restaurant website using React and Next.js.
- **IMASS Insurance:** Built a collective insurance management platform and the “Seguros con Causa” website.
